## Quick Start

Once you launched the FlippingBook PDF Publisher you can easily convert any of you pdf documents to an amazing representation by only clicking “import” then “publish” buttons.

## Application Interface

### Toolbar Buttons

#### *New*

Creates a new project with the default settings.

#### *Open*

Opens previously saved project.

#### *Save*

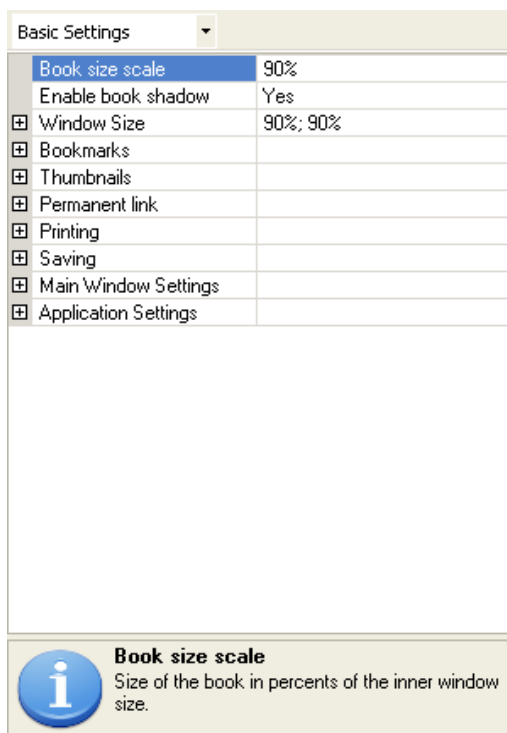

Saves current project.

#### *Import PDF*

Imports a .pdf document and converts it to pages of the flipping book.

#### *Publish*

Publish project to .exe(for desktop) or to .html(for web).

### Property Editor

This window represents all settings that could be changed. It has two view: Basic and Advanced. Basic view has all main settings that are usually needed, other settings will

appear in advanced view. Each setting has a description that is shown in the bottom of the property editor window. The “+” sign means an expandable property group group. More information about skin settings could be found in [skin parameter description chapter](#).
